

(IRM-45-xxST)

#### **■** Features

- 3.43"x2.05"compact size
- PCB, chassis or screw terminal mounting version
- · Universal input 85~305VAC
- No load power consumption<0.15W</li>
- EMI Class B without additional components
- Wide operating temp. range -30~70°C
- · Protections: Short circuit / Overload / Over voltage
- · Cooling by free air convection
- Isolation Class  ${\mathbb I}$
- Over voltage category III
- Pass LPS(Except for 5V)
- 3 years warranty

# Applications

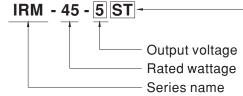

- · Industrial electrical equipment
- Mechanical equipment
- Factory automation equipment
- · Handheld electronic device

### Description

IRM-45 is a 45W miniature (87\*52\*29.5mm) AC-DC module-type power supply, ready to be soldered onto the PCB boards of various kinds of electronic instruments or industrial automation equipments. This product allows the universal input voltage range of 85~305VAC. The 94V-0 flame retardant plastic case and the fully-potted silicone enhance the heat dissipation. PCB mounting style model(Blank) meet the anti-vibration demand up to 2G and screw terminal style model (ST) meet the anti-vibration demand up to 5G; moreover, it provides the fundamental resistance to dust and moisture.

With the high efficiency up to 90.5% and the extremely low no-load power consumption below 0.15W, IRM-45 series fulfills the worldwide regulation for the low power consumption requirement for electronics. The entire series is a Class II design (no FG pin), incorporating the built-in EMI filtering components, enabling the compliance with EN55032 Class B; the supreme EMC features keep the end electronic units from electromagnetic interference. In addition to the PCB mounting style model, IRM-45 series also offers the screw terminal style model (ST).

All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. 3. Tolerance: includes set up tolerance, line regulation and load regulation. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft). NOTE 5. The power supply is considered as an independent unit ,but the final equipment still need to re-confirm that the whole system complies with the EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies."
